Subject: Microsoft Settlement

Microsoft was the company who has been in the forefront of the industry. There were no rules due to the newness of the industry. It is a shame that the competitors who followed were allowed to use the government to compete with this company instead of using American ingenuity. Free Enterprise isn't so free these days. It's time to settle this case. I believe if the competitors had the knowledge and creative minds Mr Gates does they would be able to draw the consumer to them. It is time to let the open market decide which company is their choice. There has been enough tax dollars spent on a case that should never have come about in the first place. Thank you Lynn Russ
